Absorbent Pad

Now you can add an Absorbent Pad to any LK Lab Specimen Bag to absorb leaks within the bag and prevent spills. They're made from an absorbent polymer material that can absorb up to 50 mL of liquids inside of Specimen Bags in order to prevent spills and leaks. These pads can be used with biohazardous material and comply with GB15979 guidelines to protect the health and safety of lab and other healthcare workers.

ITEM NUMBER	ITEM NAME	SIZE	CASE PACK
