

LK® Seal-N-Rip® Specimen Bags

[Seal-N-Rip Lab Specimen Bags](#) offer the convenience of a reclosable zipper to secure the contents along with a perforated tear line that makes it quick and easy to rip the bag open to remove the sample. These 3-wall bags feature an outer pocket for paperwork or forms.

Benefits:

- 3-wall Specimen Transfer Bags have an outside pocket for forms or paperwork
- Reclosable Zipper closure
- Perforated tear line for rip-open speed and convenience

Absorbent Pad

Now you can add an Absorbent Pad to any LK Lab Specimen Bag to absorb leaks within the bag and prevent spills. They're made from a polymer material that can absorb up to 50 mL of liquids and can be used with biohazardous material. They comply with GB15979 guidelines to protect the health and safety of lab and other healthcare workers.
